BUILDING BRIDGES BETWEEN CME & QUALITY

Our goal for this webinar is to utilize CME as a strategic asset to ensure the development of relevant quality education for physicians and staff in our Affiliate facilities. In addition, CME professionals and stakeholders should be able to make a transition from thinking about the effectiveness of CME activities to the impact of their organization's overall CME Program.

Learning Objectives:

Upon Completion of this live webinar, participants should be able to:

1) Utilizing CME as a tool for contribution to the overall quality improvement (QI) within a facility, and employing a multidisciplinary approach to do so;
2) Recognizing and linking performance & quality improvement initiatives or opportunities within a facility or division and using CME to address or play a key role in accomplishing those improvements;
3) Identifying resources available to aide in intertwining quality with CME.

Presenter: Valerie Gale-Anderson, RN, MAOM

Valerie is an accomplished leadership professional with a diverse background in Healthcare Improvement, Leadership Development, Service Excellence Deployment, Change Management Strategies and Healthcare Information Technology Implementation. In addition, she is a published author and founder and CEO of areté3.12 LLC— an organization devoted to advancing leadership strategies that encourage personal and professional growth essential to thrive in business and life. Valerie Gale-Anderson is also the System Vice President for Performance Improvement at Texas Health Resources in Arlington, Texas.
