

MC/HSF Billable vs. Non-Billable Charges

Generates a billable MC and/or HSF charge:	Does NOT generate a billable MC or HSF charge:
<ul style="list-style-type: none"> Labs processed at UVA's Clinical Lab. 	<ul style="list-style-type: none"> Labs sent to a central or sponsor's lab, processed in a research lab, GCRC's Core Lab, or banked for later processing.
<ul style="list-style-type: none"> Phlebotomy done by UVA's Clinical Lab or the Phlebotomy Team. 	<ul style="list-style-type: none"> Phlebotomy done by a research coordinator or an ICU nurse.
<ul style="list-style-type: none"> ECG's done at Cardiology (remember, there is a MC charge for the tracing & an HSF charge for the reading) 	<ul style="list-style-type: none"> ECG's traced on a study team's ECG machine & read by a study physician or sent to a central reader.
<ul style="list-style-type: none"> Most radiological procedures (don't forget to include the contrast agent if applicable) 	<ul style="list-style-type: none"> MRI's on John Christopher's research scanner (there will be an internal financial arrangement with the Investigator)
<ul style="list-style-type: none"> Some medications 	<ul style="list-style-type: none"> Medications provided by the sponsor, dispensed by UVA's Investigational Pharmacy, or prescription scripts sent with the subject. Be careful, there may still be a billable infusion charge.
<ul style="list-style-type: none"> Provider-based clinic visits & Hospitalization 	<ul style="list-style-type: none"> Research visits taking place in designated research space

Please note, the following procedures do not generate MC or HSF charges, & **do not need to be included on the Study Billing Coverage Analysis table:**

- Informed Consent
- Concomitant Medications
- Adverse Event Assessment
- Questionnaires
- Vital Signs
- Physical Exams & Review of Medical History (Although you will need to pay attention to whether or not study team is receiving funding for these. This will apply to our "Visit" designation.)

Here are some procedures that may or may not generate MC/HSF charges and **should be included on the tables:**

- Neurological Exams
- Spirometries
- 6-Minute Walks or Stress Tests
